Week 9

← Week 9

- to challenge Kaggle, first "Titanic"
- --> Deep Learning by Coursera-->NMIST
- -Machine Learning: A Probabilistic Approach by Murphy. --- this seems to be high level.
- -Numerical Optimization by Nocedal --- this seems to be also high level.
- -Convex Optimization by Boyd. ---- there are many YouTubes

Could you give me something you know on each above?

Is there anything kind of course in Stanford(Coursera) which is good for my target(Getting used to)?

Thanks.

The site www.kaggle.com is known for its exercises. For the rest you'll have to see what matches your level.

De nada.

I'll leave this thread open so other students can make suggestions.
